

Old Fashioned Dory Plans - Simplicity of Style

You'll find those uncommon few out there that love the idea of having a Dory. Even more exceptional are those who would build their own from a set of Dory plans. This uncommon type of men (and women) get great pride in contributing to the great maritime heritage of our modern day world by building and using a Dory. Building one from a set of plans is challenging yet satisfying. That is not to mention the bragging rights involved.

Locating a set of Dory plans is the first task. When you find a source (there are many online), your next step is to acquire a set for yourself. Once you have them and you have taken a few minutes to look at them, a number of things grow to be obvious. First, the plans will include a bill of materials. You'll have to locate a source of these materials. Some of them can be found locally, yet sometimes you might have to order items from some of the many good Marine Supply businesses out there. Specialty components comes to mind, ie. oarlocks, etc. Your plans will most likely list some sources for supplies.

While you take a look at the plans, there will be a detail about how your boat is going to be reinforced as it's getting built. It may be something as easy as a strong-back or perhaps a supporting framework. That's where you will begin the procedure. Familiarize yourself with the details.

When you are ready to get going, you'll have to decide whether to build indoors or perhaps outdoors. The two choices have their strong points. Should you build inside, you will have better power over the temperature and protection from the elements, but there is a danger from the accumulation of gases from the numerous chemical substances you will utilize. Sufficient ventilation is a must. And keep a good fire extinguisher handy. However, if you select the outdoors option, you won't have to worry about air flow. You will, however, need some type of cover to protect your boat till it's completed. A quality tarpaulin is a popular choice.

Your plans will have most of this information mentioned, however considering these things ahead of time will be worth your time and effort. Your boat will be a source of pride and you're sure to boast a little too. You'll be joining a number of proud boat builders when your project is complete.
